

Insert a NO output at the bottom of block 163;
Extend the lines from blocks 177, 167 and 175 to block
164.

REMARKS

A review of the above-identified patent application uncovered a drawing error with respect to FIG. 7. Specifically, a YES/NO decision block 162 had three outputs, not two. Moreover, the outputs from blocks 167 and 175 are connected to the NO output from block 163. As supported by the specification, particularly the specific description of each of four scenarios spanning pages 32 through 38, the bottom output from block 163 should be the NO output. The right hand NO output should be deleted. The outputs from blocks 177, 167 and 175 should be directed to the input of block 164.

A copy of FIG. 7 is attached with the requested changes annotated in red ink. Applicant is submitting a new formal drawing of FIG. 7.

If there are any questions, we urge the Examiner to call us collect. Please charge any costs in connection with this document to Deposit Account No. 05-0889.

Respectfully Submitted,

GEORGE A. HERBSTER,
Attorney, Reg. No. 24,002
